

The importance of Reconnective Healing and The Reconnection® becomes clear when one reads '**THE BOOK OF KNOWLEDGE; THE KEYS OF ENOCH**'. It is a text of higher consciousness about 64 areas of science and explains how the human race is connected with a more advanced higher evolutionary structure of universal intelligence. This bestseller has been translated into several languages. One can find more about this book on www.keysofenoach.org

This book was published 1977, by Dr. J. J. Hurtak, a Social Scientist and Futurist, 15 years before Dr Eric Pearl became able to access the frequencies of Reconnective Healing®. Relevant are chapters 314 and 317.

Here are some excerpts out of J. J. Hurtak's book:

Chapter 314, page 486

59. "Through a projection of Light coming from the recorder cell (or Merkabah activity) selected individuals can be **reconnected** with the Adam Kadmon image through a resonance operating through hyperdimensional space.

60. And, at this time those individuals who have not had the divine image can be opened to receive the image of the Adam Kadmon.

61. Some individuals receive an additional high frequency resonance transmission operating in parallel phase with their normal resonance bonding. This additional high frequency resonance operates as a subcarrier (through these individual biotransducers) to modulate paranormal energies.

65: Moreover, as this high frequency resonance becomes aligned with the biotransducer system of the body the seven chakras can be completely transfigured into the divine image."

Chapter 317, page 523.

1. "There is at work within all biological systems a path of interchangeability to standardize unique vibratory levels. **Our galactic body of creation controls the renewing functions through meridian *axiatonal lines* which are the equivalent of acupuncture lines that can connect with resonating star systems.**

2. These *axiatonal lines* are not limited to a physical body or a biological creation, but are open ended and can connect the body vehicle with axiatonal lines that emanate from the various star populations and exist as chemical code mechanisms.

3. When Man can discover the connection between his life space and the axiatonal grids controlling the body through endless cell division, Man will have a new superscience known as *medical astronomy*.

17. Therefore acupuncture, as used during the last 12.000 years of evolutionary existence, was cut off from the "progressive" higher star programming channels when the root races revolted against the programming of the Father. This caused the twelve biophysical meridians to be truncated from direct connection with the Overself.

19. Until this time, the body has been left to work on molecular biological levels with only limited magnetic resonance patterns to continue the functions of the amino acids, the basic building blocks of life.

21.. In other words Man was cut of from the higher star points that are necessary to maintain a perfected form of the Adam Kadmon.

24. Man at this time, is being advanced to a new biological program,

25. This advancement requires his acupuncture lines be extended to axiatonal lines that will be connected directly with the Overself; for if Man is to go on into further soul progression he must connect his axiatonal lines to his Overself which is also making an ascension into the next quantum level of the Adam Kadmon, just as the Adam Kadmon body is making an ascension into a completely new program in our Son universe.

29. The **axial** lines are part of a fifth-dimensional circulatory system combining color and sounds, which are used to draw from the Overself body the basic energy used for the renewing functions of the human evolutionary body.

Adam Kadmon: Spiritual-physical creation on the planetary worlds, a being articulated from a divine radiation that was later nullified through the FALL, resulting in the loss of spiritual gifts.

Axiatonal lines: connect the human biological system with superior astrobiological analogs.
